Cancellation of non-elected claims 18-30 is suggested.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 3-6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The recited molecular weight is indefinite in not specifying a particular average molecular weight such as a number or weight average molecular weight.

Applicant states that the claims refer to the weight average molecular weight, but claims do not recite said weight average molecular weight, and such statement has no support in the originally filed specification. See *Ex parte Simpson*, 61 USPQ2d 1009 and enclosed copies of pages 32-33 of *Polymer Science Dictionary*, 2nd Ed. by Mark Alger, Chapman & Hall, 1997 wherein various average molecular weights are taught.

Rejection is maintained. Applicant points various sections of the specification for the asserted weight average molecular weight, but said various sections do not show the weight average molecular weight.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 1714

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 31 is rejected under 35 U.S.C. 102(e) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Domb et al (US 6,007,845).

Rejection is maintained since Domb et al teach the instant thermogelling biodegradable graft copolymer in Fig. 2a, Schematic rep. Showing (PLA or PCL, PGA or PSA) grafted with three PEG.

Claims 32-34 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Cha et al (US 5,702,717).

Cha et al teach the instant thermogelling biodegradable polymer of ABA block copolymer in abstract and at col. 7, lines 31-67 wherein B is taught as PEG. Said ABA block copolymer meets the instant graft polymer since the structure of ABA meets both block and graft copolymer. Thus, the instant invention lacks novelty.

Claims 1, 2 and 7-17 are allowed.

Claims 3-6 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
